---

SUMMARY

Early-career full stack developer with experience developing school management modules and a student well-being platform. Hands-on experience with JavaScript, TypeScript, React, Laravel and FastAPI, including frontend development, backend services, database integration and RESTful APIs. Seeking to contribute practical development and problem-solving skills to your business.

WORK EXPERIENCE

09/2024 – 01/2026

Web Developer
Sentisphere

- Spearheaded the development of Sentisphere, a web-based and mobile sentiment analysis system engineered to monitor student emotional health data.
- Engineered frontend and backend components, managed database integration, and implemented core system functionalities utilizing modern web technologies.
- Authored system planning documents and created architectural and workflow diagrams throughout the project lifecycle.

06/2026 – Present

Junior Web Developer
Essentiel CK Childrens Publishing

- Developed and maintained modules for a School Management System, including a Human Resource & Payroll Portal and Registrar Portal.
- Implemented features for employee management, payroll processes, records management, and registrar-related workflows.
